

Diamond Ranking

Pairs

1. If each pair are given more than 9 items, they first have to select 9 items, in relation to the criteria.
2. Each pair ranks the items in layout as above with the most 'valued' item, in relation to the criteria, at the top and the least 'valued' at the bottom.
3. Each pair links up with another pair and shares their own rankings with the other.

Fours

1. Each group of four creates a new diamond from the items using the same criteria.

Reflection

1. At first, what were the differences and similarities between the two diamonds?
2. In developing a third diamond, how did your group arrive at consensus?
3. Was it hard or easy to reach consensus? Why do you think that was?
4. Did everyone feel that their ideas were listened to?
